

REMARKS

According to a June 8, 2009 interview initiated by the Examiner, "lower urinary tract symptoms" should not be recited in claim 17 because lower urinary tract symptoms are not considered by the Examiner to relate to a disease or disorder. Solely to advance prosecution, claim 17 has been amended to remove "lower urinary tract symptoms." Claims 37 and 38 have been added, which are directed to such symptoms. No new matter has been added by this amendment.

Applicants request that the present application be passed to issuance.

Respectfully submitted,

Jason C. Chumney
